

**Blueventure:  
Blockchain Lab** Event ends in 1 hour 44 minutes.[Event dashboard](#) > [Create a Hyperledger Fabric Network](#) > **Create Network & Member**

## Create Network & Member

This first section will be performed using the AWS Management Console to create the Supply Chain blockchain network and the Retailer member. Workshop participants should have received credentials for accessing a temporary AWS account. Alternatively, you can execute these commands on an account of your own. The retailer in each group should now sign into the [AWS Management Console](#), then search for and select Amazon Managed Blockchain service.
